SE – Introduction to Web Technologies – HTML and CSS

Session – 1

1. **Open Instagram's home page in Chrome, right-click on a post image, and use Inspect Element to find the exact HTML tag and CSS class used for the image container. Write down the tag name and class.**

Ans : -

Typically, you'll find something similar to:

- Tag: img
- Class: A dynamically generated class such as _aagt, _aa63, or another automatically generated class.

Write down exactly what appears in your browser, since it may differ.

Tag Name: img

Class: _aagt

2. **Create a simple HTML file named myprofile.html that displays your name, a short bio, and a profile picture using appropriate HTML tags (h1, p, img). Open it in your browser and view the result.**

Ans : -

myprofile.html :

```
<!DOCTYPE html>
<html>
<head>
    <title>My Profile</title>
</head>
<body>

    <h1>Rahul Sharma</h1>

    <p>
        Hello! I am a student learning HTML and web development.
        I enjoy programming, reading, and exploring new technologies.
    </p>

    <img src="profile.jpg" alt="Profile Picture" width="200">

</body>
</html>
```

3. **Use Chrome DevTools to change the background color of your name (in myprofile.html) to any color you like, live in the browser, without editing the HTML file.**

Ans : -

1. Open myprofile.html in Chrome.
2. Right-click your name (<h1>).
3. Select Inspect.
4. In the Styles panel, click inside the CSS rules.
5. Add the following style:

```
background-color: lightblue;
background-color: yellow;
```

4. **Draw a diagram or write a list showing the DOM structure (parent-child relationships) of your myprofile.html page. Include at least 3 levels (html > body > your content).**

Ans : -

```
html
│
├── head
│   └── title
│
└── body
    ├── h1
    │   └── "Rahul Sharma"
    │
    ├── p
    │   └── "Hello! I am a student learning HTML and web development..."
    │
    └── img
```
