SE – Introduction to Web Technologies – HTML and CSS

Session – 7

1. **Create an HTML file with a container div and 4 images of your favorite apps (Instagram, WhatsApp, Zomato, Spotify) as social icons. Use CSS Flexbox to display them in a row with equal spacing using justify-content.**

Ans : -

```
<!DOCTYPE html>
<html>
<head>
    <title>Social Icons</title>

    <style>
        .container{
            display:flex;
            justify-content:space-evenly;
            align-items:center;
            margin-top:50px;
        }

        .container img{
            width:80px;
            height:80px;
        }
    </style>

</head>
<body>

<div class="container">
    <img src="instagram.png" alt="Instagram">
    <img src="whatsapp.png" alt="WhatsApp">
    <img src="zomato.png" alt="Zomato">
    <img src="spotify.png" alt="Spotify">
</div>

</body>
</html>
```

2. **Build a horizontal playlist bar like Spotify using Flexbox: add 5 song cards with song name and artist, and use align-items to vertically center the text in each card.**

Ans : -

```
<!DOCTYPE html>
```

```html
<html>
<head>
    <title>Spotify Playlist</title>

    <style>

        .playlist{
            display:flex;
            gap:20px;
        }

        .song{
            width:180px;
            height:80px;
            background:#1DB954;
            color:white;
            display:flex;
            align-items:center;
            justify-content:center;
            border-radius:10px;
            text-align:center;
        }

    </style>

</head>
<body>

<div class="playlist">

    <div class="song">
        <div>
            <strong>Believer</strong><br>
            Imagine Dragons
        </div>
    </div>

    <div class="song">
        <div>
            <strong>Perfect</strong><br>
            Ed Sheeran
        </div>
    </div>

    <div class="song">
        <div>
            <strong>Levitating</strong><br>
            Dua Lipa
```

```
        </div>
    </div>

    <div class="song">
        <div>
            <strong>Shape of You</strong><br>
            Ed Sheeran
        </div>
    </div>

    <div class="song">
        <div>
            <strong>Blinding Lights</strong><br>
            The Weeknd
        </div>
    </div>

</div>

</body>
</html>
```

3. **Design a Flipkart-style product grid: create a section with 6 product cards (use placeholder images and product names), and use CSS Grid to arrange them in 3 columns and 2 rows.**

Ans : -

```
<!DOCTYPE html>
<html>
<head>
    <title>Product Grid</title>

    <style>

        .grid{
            display:grid;
            grid-template-columns:repeat(3,1fr);
            gap:20px;
        }

        .card{
            border:1px solid #ccc;
            padding:10px;
            text-align:center;
        }

        .card img{
```

```
            width:150px;
            height:150px;
        }

    </style>

</head>
<body>

<section class="grid">

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 1</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 2</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 3</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 4</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 5</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 6</p>
    </div>

</section>

</body>
</html>
```

4. **Make your product grid responsive: use grid-template-columns to show 3 columns on desktop, 2 columns on tablet, and 1 column on mobile**

**screens.

Hint: Use CSS media queries to change grid-template-columns based on screen width.**

Ans :

```
<!DOCTYPE html>
<html>
<head>
    <title>Responsive Product Grid</title>

    <style>

        .grid{
            display:grid;
            grid-template-columns:repeat(3,1fr);
            gap:20px;
        }

        .card{
            border:1px solid gray;
            padding:10px;
            text-align:center;
        }

        .card img{
            width:150px;
            height:150px;
        }

        /* Tablet */
        @media (max-width:768px){
            .grid{
                grid-template-columns:repeat(2,1fr);
            }
        }

        /* Mobile */
        @media (max-width:480px){
            .grid{
                grid-template-columns:1fr;
            }
        }

    </style>

</head>
<body>

<section class="grid">
```

```
    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 1</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 2</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 3</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 4</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 5</p>
    </div>

    <div class="card">
        <img src="https://via.placeholder.com/150" alt="">
        <p>Product 6</p>
    </div>

</section>

</body>
</html>
```
