SE – Introduction to Web Technologies – HTML and CSS

Session – 9

1. **Create a Bootstrap layout for a Flipkart-style product card page: use a container with a row, and display three product cards side by side using the grid system's columns.**

Ans : -

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Flipkart Products</title>

    <link
href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css"
rel="stylesheet">
</head>
<body>

<div class="container mt-4">

    <div class="row">

        <div class="col-md-4">
            <div class="card">
                <img src="https://via.placeholder.com/200" class="card-img-
top" alt="Product">
                <div class="card-body">
                    <h5 class="card-title">Samsung Galaxy S25</h5>
                    <p class="card-text">₹74,999</p>
                    <button class="btn btn-primary">Buy Now</button>
                </div>
            </div>
        </div>

        <div class="col-md-4">
            <div class="card">
                <img src="https://via.placeholder.com/200" class="card-img-
top" alt="Product">
                <div class="card-body">
                    <h5 class="card-title">iPhone 16</h5>
                    <p class="card-text">₹89,999</p>
                    <button class="btn btn-primary">Buy Now</button>
                </div>
```

```
            </div>
        </div>

        <div class="col-md-4">
            <div class="card">
                <img src="https://via.placeholder.com/200" class="card-img-
top" alt="Product">
                <div class="card-body">
                    <h5 class="card-title">OnePlus 13</h5>
                    <p class="card-text">₹59,999</p>
                    <button class="btn btn-primary">Buy Now</button>
                </div>
            </div>
        </div>

    </div>

</div>

</body>
</html>
```

2. **Build a Zomato restaurant listing page using Bootstrap grid: arrange two restaurant cards per row, each card showing a restaurant name and a short description.

Hint: Use col-6 inside a row to get two equal columns per row.**

Ans : -

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Zomato Restaurants</title>

    <link
href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css"
rel="stylesheet">
</head>
<body>

<div class="container mt-4">

    <div class="row">

        <div class="col-6">
            <div class="card p-3">
```

```
                <h4>Spice Garden</h4>
                <p>North Indian & Chinese Cuisine</p>
            </div>
        </div>

        <div class="col-6">
            <div class="card p-3">
                <h4>Pizza Hub</h4>
                <p>Italian Pizza and Pasta</p>
            </div>
        </div>

        <div class="col-6 mt-3">
            <div class="card p-3">
                <h4>Burger Point</h4>
                <p>Fast Food and Snacks</p>
            </div>
        </div>

        <div class="col-6 mt-3">
            <div class="card p-3">
                <h4>Royal Biryani</h4>
                <p>Hyderabadi Biryani Specials</p>
            </div>
        </div>

    </div>

</div>

</body>
</html>
```

3. **Design a BookMyShow-like movie details section using Bootstrap: place a movie poster image in one column and movie details (title, genre, rating, and a 'Book Now' button) in the second column, using the grid system.**

Ans : -

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Movie Details</title>
```

```
    <link
href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css"
rel="stylesheet">
</head>
<body>

<div class="container mt-5">

    <div class="row">

        <div class="col-md-4">
            <img src="https://via.placeholder.com/300x450" class="img-fluid"
alt="Movie Poster">
        </div>

        <div class="col-md-8">
            <h2>Avengers: Endgame</h2>
            <p><strong>Genre:</strong> Action, Adventure</p>
            <p><strong>Rating:</strong> ⭐ 4.8/5</p>
            <p>
                The Avengers assemble once again to reverse the destruction
                caused by Thanos in an epic battle.
            </p>

            <button class="btn btn-danger">
                Book Now
            </button>
        </div>

    </div>

</div>

</body>
</html>
```

4. **Refactor your 2-column layout to be mobile-friendly: make the columns stack vertically on screens smaller than 576px using Bootstrap's responsive grid classes.

Hint: Try using col-12 for xs and col-6 for md and above.**

Ans : -

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
    <title>Responsive Bootstrap Layout</title>

    <link
href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css"
rel="stylesheet">
</head>
<body>

<div class="container mt-5">

    <div class="row">

        <!-- On mobile: full width (col-12)
             On medium screens and above: half width (col-md-6) -->

        <div class="col-12 col-md-6">
            <img src="https://via.placeholder.com/300x450"
                 class="img-fluid"
                 alt="Movie Poster">
        </div>

        <div class="col-12 col-md-6">
            <h2>Avengers: Endgame</h2>
            <p>Genre: Action, Adventure</p>
            <p>Rating: ★ 4.8/5</p>

            <button class="btn btn-danger">
                Book Now
            </button>
        </div>

    </div>

</div>

</body>
</html>
```
